EDUCATION

Stanford University

MS CS | 3.9 GPA

Birla Institute of Technology, Pilani

Bachelor in CS | 9.7 GPA

EXPERIENCE

NVIDIA | Intern @ GEAR Lab

- Worked on training of [GR00T N1.6](#)
- Worked on offline RL post-training stack for GR00T

Teaching Assistant | Stanford

- Deep RL (CS224R, Prof. Chelsea Finn)
- Reinforcement Learning (CS234, Prof. Emma Brunskill)
- Infra at Scale (CS153, Anjey Midha)

NVIDIA | Intern @ Nemotron Post-training

- Worked in the Nemotron LLM post-training team on async RL

Stanford AI Lab (ILIAD)

- Worked as a grad researcher on data retrieval methods for few shot learning ([CoRL 2025 Oral](#))

Microsoft Research | Pre-Doctoral Fellow

- Worked on Extreme Multi Label Learning (multi-label classification with million+ labels). I primarily worked on improving performance of extreme classifiers via distillation. [ICLR 2024](#)
- Worked with Turing Team on factorization and sparsity methods for Transformer compression. [EMNLP 2022](#)

OPEN SOURCE CONTRIBUTIONS

- **Compute requirements for LLMs** ([Github](#)) | 1400+ ★
 - Tool to check GPU vRAM requirement and token/s for training & inference of any LLM
- **Isaac-GR00T** ([Github](#)) | 6000+ ★ (contributor)
 - Co-Lead the open sourcing of NVIDIA's latest robot foundational model (GR00T-N1.6-3B)
 - More than 40k+ HF downloads since release
- **Nemo-RL** ([Github](#)) | 1000+ ★ (contributor)
 - Contributed to the Nemo-RL post-training library (async rl) during intern at Nemotron Team
- **Nemo-Gym** ([Github](#)) | 500+ ★ (contributor)
